FEATURES & DESCRIPTION

Orange Bump Cap, front brim style, 4 pt. pinlock fits hat sizes 6 1/2 - 8 1/4, Replaceable sweatband included Lightweight HDPE shell materia

Safe Handler HDPE Bump Cap has been made from HDPE (high-density polyethylene) and is designed to be lightweight, providing comfort, durability, protection, and stability to keep you safe. Designed with added comfort in mind, the vented sides enhance the air flow, which keeps the head cool, while the front brim blocks the sun's glare. The bump caps ensure increased head protection by decreasing exposure to lacerations and abrasions triggered by head bumps. These bump caps are only suitable for workplaces that do not require ANSI standards. Well designed for work at home in the garage, around the house, or even on some construction worksites. The Bison Life Bump Cap is not only used for protection during construction work, but is also appropriate for jobs in shipping and warehouse industries, around cranes and forklifts and in power plants.
