

CONTRASTING ARTIFICIAL INTELLIGENCE WITH HUMAN INTELLIGENCE: WHERE ARE WE, AND WHERE ARE WE GOING?

THURSDAY: SESSION 1, TRACK 1

SESSION CHAIRS

- Katya Le Blanc, Idaho National Laboratory
- David Manz, Pacific Northwest National Laboratory
- Char Sample, Idaho National Laboratory

SESSION ABSTRACT

This session will explore the state-of-art in artificial intelligence and explore topics including, but not limited to:

- What is the current state-of-the-art in AI, how does what we can do with AI compare to what humans can do?
- Where should AI be used to replace human decision making, and where should it be used to enhance human decision making?
- What are the unintended consequences of using AI?
- What are the data challenges in using AI, and how does data influence the outcome in AI based systems?
