

DOE SOLAR & WIND ENERGY COLLABORATIVE RESILIENCE RESEARCH PROJECTS

WEDNESDAY: SESSION 1, TRACK 1

SESSION CHAIRS

- David Walter, Department of Energy
- Bret Barker, Department of Energy

SESSION ABSTRACT

The strategically applied use of renewable energy sources promises to increase the resilience of distribution and transmission systems. Recognition of where resilience can be achieved requires proper measures that considers all the aspects of resilience, including the most cost effective and resilient integration of assets to adapt and recover to natural disasters and cyber-attack.
