

BeFighter - Boxing Event / Mixed Martial Arts / Fight Club Responsive Muse Template

Documentation by "Vinyljunkie" v1.0

Created: 27 February 2017

By: Serge Gray aka [Vinyljunkie](#)

Thank you for purchasing my template! If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#).

BeFighter - responsive Adobe Muse template for a boxing match event, MMA event, fight club, friendly match, training or a fight for the championship in martial arts. A professional responsive Muse template will allow you to create a website without writing any code in a very short time.

Promote your event on the network using the responsive BeFighter Muse template, sell tickets to the event and share information with your prospective audience!

The template has an exclusive design and is only available on Themeforest.

Features

- Fully responsive Muse template with breakpoints (ready for all devices: mobile, table and desktop)
- Exclusive design by an Elite Author
- Parallax / Scroll effects
- Free Edge Fonts used
- Well organized and easy to edit template

Package included

- .muse file
- HTML preview
- Documentation

Photos not included, only for preview.

Software requirements: latest Adobe Muse version.

Note: This template is for use with Adobe Muse and can't be used in Wordpress as theme.

Open template in Adobe Muse

- Unzip the downloaded archive.
- Find BeFaster.muse file. Open this file in Adobe Muse for editing or doubleclick on it (this will open straight into Adobe Muse). Make sure you have latest version of Adobe Muse.

Customization

Full info about how to use Adobe Muse [here](#) and [here](#).

In Muse

Once you get Muse opened you'll want to head over to the "Design" tab - then open the "Home" page. In "Design" you can edit all of the bits you see once the site has been published.

PS. To be able to edit everything on the page you should right-click and select "Unlock All on Page", and to add metadata like keywords, page description etc. you'll need to right-click and select "page properties."

Previewing

When you've made a change to the theme you can just as easily preview it. Just head up to "Preview" in the menubar and click it. Once the preview generates it'll show you the site in the built-in Muse browser, but to view it how everyone else will see it just go to "File" then "Preview in Browser" - this will load in your default browser.

Replacing/changing images in Muse

Select the rectangle you want to fill with a new image and select new image.

Exporting

This part is even easier.

1. Go to "File" in the menubar, then "Export as HTML"
2. Enter your website name
3. Make sure to save it to the HTML folder already there

You just need to upload it via FTP now.

Quick change color in template

Double click on color in "Swatches" panel and change the color.

Export template

After customization save template and export site to HTML or upload to FTP host.
