

# LessonMate

## Online Makeup Lesson Software

### Hello Teachers!

We're excited to announce a new makeup lesson policy for the school! To implement this new policy, we're using software called **LessonMate**.

Using LessonMate, you'll create online makeup lessons during a student's missed lesson time. You can also create lesson notes that will help with student practice and engagement between lessons.

Here is [the website](#) and a [video explaining how it works](#).

It's super easy to use and will greatly simplify how we deal with missed lessons.

### How LessonMate Works

Within LessonMate you can write text and record personalized video and audio. You can upload PDFs, MP3s and photos. You can also embed YouTube videos right in the lesson. All in the student's own online LessonMate journal.

All your material is accessible with a simple "click" inside your very own Teacher Library. Use this material again with any student. It's saved in the cloud so you can access it anywhere, anytime.

You can use any device - desktop/laptop, smartphone or tablet.

If a student misses a lesson - for any reason - go ahead and create a LessonMate lesson. Here's an [example makeup](#) to interact with and an [article to read](#) about how to create an online makeup.

This will be our new makeup policy. Miss a lesson, get a LessonMate online lesson. You will do this during the students regular scheduled lesson time.

As soon as your account is set up you will receive an email with your password and some helpful links. You'll also get a series of emails detailing features. Let us know if you have any questions about school policy. Let LessonMate know if you have questions about the app itself.

You can also check out the [LessonMate Help Center](#) for tutorials about using all the features of the app.

**We think this will be a win-win-win all around!**
