You Get Access To Step-by-Step Videos That Show You How To Do It The Right Way, From A Private Label Rights Expert That Has Seen What Has And Hasn't Worked. This Is From Real Experience, Not Theory.

From the Desk of:

[Your Name]

Dear Friend,

One of the fastest ways of making consistent viable income is to create your own product and sell it. The problem is that not everyone has the time or the expertise to do so. You see, if you don't have your own product, branded with your own name or company brand, then you're leaving money on the table.

Creating a video course is very time consuming unless you know the material well and how to teach it.

Fortunately, there are premade video products out there with Private Label Rights, a right that allows you to reposition it in your own brand name.

But here's the downside - 99% of the population buy these types of products with these rights and simply stamp their names on the product. Looking like everyone else is the fastest way to fail and not make lots of profit.

But you're the smart 1% of the population because you know you don't want to be like everyone else.

So, what exactly do you need to do?

Introducing...

<title>

This step-by-step, 9-part video series takes you by the hand and shows you how to take your private label rights videos to the next profit level.

You'll learn strategies you can use starting today that will bring you closer to your end goal.

Video #1: Introduction

First things first, you're going to learn about your mindset and how it can be the difference between success and failure. So, in this particular video we will provide a quick overview of what we'll discuss in this video course. Last but not least, we'll talk about the things you need to have on hand before we get started.

Video #2: What Everyone Else Does

The best way to win in the PLR business is to avoid doing what everyone else is. But what is everyone else doing? And more importantly, who is everyone else? In this video, we will discuss the answer to all of these questions so that you can create your best winning strategy.

Video #3: The Missing Piece

Did you know there is something preventing you from reaching your full potential? Part of this reason is because the product is already created and you've already skipped the process. When you create a product, there is a passion burning inside that helps you make more money. But buying PLR and skipping this process can actually hurt you. This is something no one else has discussed and why you'll be able to succeed with it.

Video #4: How To Help

Part of the reason why most people fail when it comes to selling PLR is because they sell it as it is. There is no added value to make the product stand out among the other 200 or even 1000 other people who bought the same product, right? Therefore, in this particular video you will learn how to figure out what kind of value you need to add to the product to make it super unique.

Video #5: Voice Reputation

Some very common concerns that we receive all the time include, "My voice doesn't sound like the speaker's voice," "How do people know it's

me?” Or, “Will people think ill of me since it’s not my voice?” We'll tackle this common concern with a very easy and simple solution, and I'll show you why it's not a big deal.

Video #6: Intro Logo Stings

Now that you understand the fundamentals, we can actually jump straight into rebranding the video course. The first thing that I suggest that you start doing is to rebrand all of your videos by adding a very short logo in the beginning of each video. This could be in the form of a logo or even a very short “logo sting”. Some common questions include, “How long should this be?” as well as, “How do you go about finding or creating these logo stings?”

Video #7: Software Required

In this particular video, we are going to show you what you need software wise to take the logo sting that you created in the previous video, and add them to your video course so that you can essentially do a total rebrand.

Video #8: Time To Rebrand

So now that you understand what a logo sting is and what software you need, it’s time for some practical application.

Video #9: Bulk Rendering

This is not really part of the video course; it’s more of a bonus video. When it comes to video editing, rendering your videos is a very time-consuming process. With most other software, you would have to render every single project one at a time, which can actually lose you time and therefore money. Let me show you how to speed this up and save countless hours otherwise wasted.

So... with that said, grab this video series now and learn how to rebrand your private label rights video series... so you can start your profit-pulling branding machine the right way!

===

P.S. Finally, learn how to rebrand a video course the right way. Save both time and money by watching these easy-to-implement shortcuts in this video series!

P.P.S. Gain access to these step-by-step videos that show you how to build a profit-pulling video machine... straight from a private label rights expert who has made the mistakes so that you don't have to. This is all based on real experience - not theory!
